Measure solution conductivity continuously with L&N's improved Monitor

Now, equipped with a new meter and other improvements, L&N's completely transistorized line-operated Conductivity Monitor offers even greater reliability for direct-reading measurements in the laboratory or on the process line.

Outstanding features include:

- ❖ continuous indication, even above set point(s) when one- or two-point alarm signalling is provided
- ❖ a wide choice of ranges for versatility of application (even a 0 to 1-micromho/cm range, for high-purity water measurements)
- ❖ an output d-c signal for transmission to a recorder, controller or other data-logging equipment
- ❖ a model to meet *your* needs: either the panel- or wall-mounted industrial model (as illustrated) or a light-weight portable unit.

Prices start at $235 for the Industrial Model; the Portable Model is $265. Ask for Data Sheet B2.2121 (or B2.2122, describing the High-Purity Water Monitor) from Leeds & Northrup Company, 4929 Stenton Avenue, Philadelphia 44, Pa. or your nearby L&N office.

THE "NO-COMPROMISE" GAUSSMETER
(fully transistorized)

■ "Nth DEGREE" PRECISION IN DESIGN AND PRODUCTION PERMIT A LOWER MARGIN OF ERROR OVER A SUBSTANTIALLY WIDER FULL RANGE THAN ANY OTHER GAUSSMETER (±2% FROM .3 TO 30,000 GAUSS) . . . ■ IMMEDIATE DIRECT READINGS AS LOW AS .05 GAUSS ■ Measures Flux Densities, Stray Fields, and Variation of Field Strength.

EMPIRE 900

☐ 11 position range selector . . . repeatability of readings 0.5% . . . no probe ageing—temperature stable indium arsenide probe . . . special circuit design prevents probe overload . . . upper range extension for reading to 100,000 Gauss . . . measures AC or DC fields . . . operates from AC supply or from its own self-contained batteries for field use.

☐ **APPLICATIONS:** measurement of fields in loudspeaker field structures, television ion traps and focusing magnets, navigation systems, magnetron devices, relays, meter magnets, automatic generator fields, solenoids, ring magnets, missile systems, cyclotrons, and accelerometers, to name a few.
